

# IP Summary Report

## MiPCT Dashboard

► QUICK REFERENCE

### About the IP Summary Report

Each row in the IP Summary Report includes high-level information about the inpatient visits for a participating patient during the **most recent six months** of complete data available. The date range is included in the report header.

There is a separate IP Summary Report for each practice in your PO. The reports are sorted by Payer Specific Member ID.

### Location

You can view and print the IP Detail Reports from the *Download PO Reports* page. It is included in the <PO Name>\_Reports\_YYYY\_MM.zip file.

For additional information, see the PO Reports chapter in the [MiPCT Dashboard User Guide](#).

Report Most Recent 6 months (April 2015 - September 2015)

### A: Patient Identification Information

The first 10 columns provide patient identification information.

# IP Summary Report

▷ QUICK REFERENCE

## B: IP Visit Information

The following table provides information about the IP visit-related columns:

Column Heading	Description
Total IP Admissions	The number of times the patient has been discharged from an inpatient admission during the reporting period.
Most Recent Discharge Date	The date of the patient's most recent discharge from an inpatient admission during the reporting period.
# Admissions from ER	The number of admissions where the admission source is the Emergency Department.
Total LOS	The total number of days for all of a patient's inpatient admissions.
Readmissions within 30 days	The number of admissions that were within 30 days of the initial IP discharge.
ASCS Chronic	Indicates if the reason for the IP admission was defined as an ambulatory care sensitive chronic condition.*
ACSC Acute	Indicates if the reason for the IP admission was defined as an ambulatory care sensitive acute condition.*

\*For more information about ASCS conditions, see "Inpatient Utilization Measures" in the [MiPCT Dashboard User Guide](#).
