

MiPCT Dashboard Timeline

The following timeline displays date-specific information pertaining to the MiPCT project, including the dashboard release date, attribution, and measurement periods.

Michigan Data Collaborative

MiPCT Dashboard Timeline

The following timeline displays date-specific information pertaining to the MiPCT project, including the dashboard release date, attribution, and measurement periods.

Attribution

The attribution month that was used for the Dashboard release (typically the last month of the measurement year).

For Release 19.0, the June 2016 [All Payer Patient List](#) was used for attribution.

Chronic Conditions

Obesity rates are calculated using data from the most recent measurement year.

All other chronic condition rates are calculated using all available data.

1 Included Chronic Conditions:

- » ADHD
- » CKD
- » COPD
- » CAD
- » Diabetes
- » CHF
- » HTN
- » Asthma

Quality Measures

Breast cancer screening rates are calculated using data for the measurement year plus two year prior to the measurement year.

Cervical cancer screening rates are calculated using data for the measurement year plus four years prior to the measurement year.

All other quality measure rates are calculated using data for the measurement year.

2 Included measures:

- » Adolescent Immunizations
- » Adolescent Well Care Visits
- » Childhood Immunizations
- » Lead Screening
- » Well Child Visits 3-6 Years
- » Chlamydia Screening
- » Diabetes HbA1c
- » Diabetes Nephropathy
- » Diabetes Eye Exam

Standard Cost

The standard cost amounts are calculated for a one-year period (typically the measurement year).

MDC receives standard cost data from Truven Health Analytics. More information can be found in the [Standard Cost Model](#) document on the [MDC Website](#).

Utilization Measures

The 12-month rates are calculated using the measurement year.

The 6-month rates are calculated using the most recent six months of data available.

3 Included measures:

- » Overall ED Visits
- » ED Risk Adjusted Visits
- » Adult ED Risk Adjusted Visits
- » Pediatric ED Risk Adjusted Visits
- » Adult ED Visit Rates with Previous Asthma Diagnosis
- » Pediatric ED Visit Rates with Previous Asthma Diagnosis
- » Inpatient (IP) Admissions
- » Adult IP Admissions Rate with Previous Asthma Diagnosis
- » Pediatric IP Admissions Rate with Previous Asthma Diagnosis
- » Adult Acute ACSC Admission Rate
- » Adult Chronic ACSC Admission Rate
- » Pediatric ACSC Admission Rate
- » 30-Day All-Cause Readmission Rate

Risk Scores

This data comes from Truven Health Analytics, which assigns Diagnostic Cost Group (DCG) scores to eligible MiPCT patients. The scores are assigned based on the most recent twelve months of data (typically the measurement period).

Trends

Shows the timeframe used for each trend period. Each trend includes a three month run-out period for claims.
