About the PO Comparison Reports

You can view and download PO Comparison reports to determine how your PO or practice is doing compared with other POs and practices.

Types of Measures Compared

There are three types of measures compared in the comparison reports:

- **Quality Measures**
- **ED Utilization**
- **IP Utilization**

Report Types

For each of these measure types, you can view the following report types:

- **PO Comparison** – Displays data comparing all POs in the MiPCT project
- **Practice Comparison** – Displays data comparing all practices within a PO

Both reports also contain MiPCT benchmark and overall rates.

Location

You can view and print the PO Comparison Reports from the *Download PO Reports* page of the MiPCT Dashboard. The reports are included in the <PO Name>_Reports_YYYY_MM.zip file.

Additional Information

For additional information, see the PO Comparison chapter in the [MiPCT Dashboard User Guide](#).
