
OBI Dashboard Release Notes

June Dashboard Release

June 6, 2025

This document provides information about the data and features included in releases of the Obstetrics Initiative (OBI) Dashboard.

OBI Eligible Population

The eligible population for the initial minimum viable product (MVP) version of the implementation includes pregnant individuals with this pregnancy outcome:

1. Full-term pregnancy (37-42 weeks)
2. For measure calculations, a full-term delivery will be considered to have occurred at exactly 39 weeks gestation
3. Live birth, vaginal or cesarean delivery
4. Exclude any pregnancies with evidence of a preterm outcome
5. Exclude stillbirth
6. Continuously enrolled with the same insurance (either BCBSM or Medicaid) for the entirety of the pregnancy

Data Includes the following

- The dashboard is populated with Blue Cross Blue Shield of Michigan (BCBSM), Medicare Advantage (BCBSM MA), Blue Care Network (BCN), and BCN Advantage (BCN-A) claims data from participating OBI hospitals from 1/1/2021 through 12/31/2024.

Additional Documentation

Additional OBI CQI documentation includes:

- User Guide. The [OBI User Guide](#) describes dashboard components and navigation.
- Access and Setup Guide. The [Access and Setup Guide](#) provides detailed instructions about the steps you must complete to access the OBI Dashboard.
